

REHABILITATION WORKER (VISUAL IMPAIRMENT) Apprenticeship: ST043 I

Vision Rehabilitation Training is proud to announce the launch of their Rehabilitation Worker (Visual Impairment) Apprenticeship Training.

Key Features of our Apprenticeship Training Programme

Over 20 Years' Experience - Our team have been involved in the training of Rehabilitation Workers for over 20 years. We have used our experience of university and independent training to develop a New apprenticeship training programme that uses modern learning methods to deliver training that suits employee and employer's needs.

Multiple Start Dates - We have 3 start dates throughout the year.

- 1st Week of January
- 1st Week of May
- 1st Week of September

In addition to the above dates, we can deliver a bespoke cohort for individual or groups of employers.

Online 'in-work' training – We have:

- Developed a **bespoke online training platform** for the apprentice to access their learning and to store all their work
- Produced **weekly worksheets** that guide the apprentice through their knowledge, skill, and behaviour development
- Learnt from the COVID-19 pandemic and to counter any future disruptions embraced **Video Conferencing** to deliver classroom training
- **Focussed our face-to-face training** to maximise the practical time spent together **no prolonged periods away from the workplace**
- Developed a unique **Multiple Mentorship** approach that enables us to relieve the burden of supervision but still ensure the apprentice has the experiences and support they need

Standardisation – Our Apprentices are assessed by Occupational Awards Ltd. The End-Point-Assessment Organisation that assesses **all** Rehabilitation Worker (Visual Impairment) Apprentices.

Funding - Our courses are funded through the Government Levy funding process. Please contact us if you are an employer who does not meet the levy criteria, there are funding opportunities available.

Let us support you - If you are considering employing an Apprentice, we can support your recruitment process to ensure your candidate meets the mandatory apprenticeship requirements.

Contact us – To discuss any element of the course or to find out more, contact Dr Andrew Dodgson at andrew.dodgson@visionrehabilitationtraining.com
