

Think pharmacy first

From soothing an earache to treating a UTI, your local pharmacist can now provide treatment and some medicines for seven conditions, if necessary, without the need for a GP appointment or prescription.

These conditions include earache, impetigo, infected insect bites, shingles, sinusitis, sore throat and urinary tract infections (UTIs).

Don't wait for minor health concerns to get worse – think pharmacy first and get seen by your local pharmacy team.

Subject to age eligibility. Service available at majority of pharmacies.
