

Contact your GP practice with a tap and a type

There's another way to contact your GP practice, by simply sending your symptoms and requests through their website or the NHS App.

All requests will be reviewed by your practice team, and you'll hear back within 1 working day about next steps to get you the right care for your needs.

It's quick, easy and convenient. You can submit your request anytime between 8am–6.30pm and avoid the 8am rush.

Online forms are there for those who would prefer to use them. Whether you contact your GP practice online, by phone, or in person, you'll get the care you need from the right healthcare professional.

Tap it, type it and we'll take care of it
